Uppsala University, Human Computer Interaction, Master's Degree, Sep 2025 - Jun 2027

Chengdu College of University of Electronic Science and Technology of China, Animation, Bachelor's Degree, Sep 2007 - Jun 2011

Career experience

Gaddr — Assistant Lead Product Designer (Remote) — Stockholm County, Sweden — Oct 2025 - Jan 2026 4 months

- Designed user-centered workflows and content management interfaces for an AI-powered social media management platform (MVP1), delivering scalable desktop and mobile-first experiences for cross-platform administration.
- Architected complex administrative dashboards that enabled users to monitor cross-platform engagement data and seamlessly trigger AI-automated content publishing.
- Developed comprehensive user flows for multi-platform social linking, identity verification, and automated content collections, translating heavy administrative tasks into intuitive user experiences.
- Validated and measured design effectiveness by conducting direct A/B testing with target users, tracking adoption metrics to optimize the AI-driven management workflows.
- Expanded the proprietary Design System, creating reusable components and data visualization patterns to ensure UI consistency across the entire SaaS ecosystem.

- Collaborated closely with engineering and product management in an Agile environment to ensure flawless, implementation-ready handoffs for dynamic profile themes and complex data grids.

Essex Lake Group — UI Designer II — Shanghai/Xi'an/New York — Aug 2022 - July 2025 3 years

- Partnered continuously with PMs and engineering teams from day one to build AI-driven financial platforms for executive and management-level users, including EARS™ (Executive Action and Response Solutions) and EyeVia™ (a control and analysis platform for mid-level management).
- Designed and developed data visualization dashboards and analytical interfaces using Tableau, Power BI, and the company's proprietary financial design system, which enabled real-time insight generation, data analysis, and conversion of insights into actionable tasks. The platform empowered executives to monitor performance, manage workflows anytime and anywhere, and make data-driven decisions confidently.
- Delivered customized design solutions for clients such as a North American Top 3 bank (TD Bank) and a leading Canadian financial institution (BMO Group), aligning design outcomes with complex business goals and compliance standards.
- Led the corporate website redesign and created over 30 marketing brochures and executive presentation decks, strengthening the company's visual identity and communication strategy.
- Collaborated across data science, product, and consulting teams to ensure usability, consistency, and clarity across platforms that support true, data-driven financial solutions.

Beijing Yuanxin Technology Co., Ltd. — Mid-level Designer — Beijing, China — May 2021 - May 2022 1 year

- Created an intuitive and scalable UI/UX for cross-platform solutions, including WeChat mini programs, iOS, and Android. Focused on improving user engagement and accessibility for healthcare professionals in digital learning environments.
- Developed user-friendly interfaces that simplify prescription management and order flows.
- Created responsive, patient-centered mobile app (Yuanxin Health) UI/UX for remote consultations and medical services.
- Designed clear and accessible interfaces for policy browsing, claims, and customer support.
- Designed sophisticated dashboards and data visualizations for B2B health and big data platforms in enterprise healthcare analytics tools.

Play Basis — UI Designer — Bangkok, Thailand — Jan 2015 - Mar 2020 5 years 3 months

- Created responsive, performance-optimized websites and user-friendly iOS/Android interfaces. Emphasized usability, accessibility, and scalable design systems from wireframe to front-end collaboration, ensuring seamless user experiences.
- Led several customer solution design projects across various industries and regions, including the power and solar sector in Australia, a charging station app for clients in Poland and Vietnam, and UI/UX design for a website and ERP system for a Chinese company.
- Designed the complete UI/UX design process for various web and mobile applications in the e-commerce, services, and education sectors. Conducted research on user interactions and interface habits across five regions to inform design decisions.

Skills

Design & Prototyping

- Figma, Sketch, Lottie Animation, Adobe Creative Suite (Photoshop, Illustrator, InDesign)

AI & Frontend Development

- Cursor, Claude Code, Google AI Studio, Codex, LLM Prompting, Visual Studio Code, HTML, CSS, JavaScript, React, Tailwind CSS, Vercel, Shadcn UI, Next.js, Vite

UX Methodologies & Research

- Service Design, User Journey Mapping, User Research, Design Systems, Storyboarding, Prototyping, Service Blueprinting, Stakeholder Management, Usability Testing, Accessibility (WCAG 2.1), Agile Development, UX Writing, Human-AI Interaction, Quantitative/Qualitative UX Metrics

Product Strategy & Data

- Tableau, Atlassian Jira, Product Strategy, Data-Driven Design

Languages

- Chinese (Native), English (Professional Working Proficiency), Swedish (Limited Working Proficiency), Thai (Limited Working Proficiency)
